

Indo-US Workshop on Drug Repurposing for Improving Radiotherapy of Cancer

(Satellite meeting of the Indian Cancer Congress 2017)

13 November, 2017

Sri Ramachandra University, Chennai, India

A consortium of institutions from India and USA has been actively collaborating to repurpose existing drugs as modifiers of tumor and normal tissue responses to ionizing radiation for improving the efficacy of radiotherapy. Experts in the field of bioinformatics, cell, molecular and radiation biology as well as radiation oncologists will discuss the current status of knowledge and brainstorm on the future roadmap to achieve the targeted goal of “affordable and personalized therapy to all cancer patients”.

The workshop is a post conference satellite meeting of the Indian Cancer Congress being held at Bangalore during 8-12 November 2017.
