

CERTIFICATE COURSE IN PATIENT SAFETY (BLENDED LEARNING)

O V E R V I E W

Enhance patient safety and improve clinical outcomes with our Certificate Course in Patient Safety. This blended learning program focuses on ICU settings (Adult ICU) and integrates the renowned World Health Organization (WHO) patient safety curriculum. Gain in-depth knowledge and skills to implement effective practices and technologies that ensure patient well-being. From understanding International Patient Safety Goals to infection prevention and control, this course equips you with the expertise to make a real impact in healthcare settings. Join us and become a catalyst for positive change in patient care.

ABOUT THE COURSE

The Certificate Course in Patient Safety (Blended Learning) offered by Sri Ramachandra Institute of Higher Education, AHPI and IBHAR aims to enhance patient safety practices in various areas of healthcare organizations, with a particular focus on ICU settings (Adult ICU). This course is designed to improve clinical outcomes by implementing processes and methodologies monitored and evaluated using technology-based solutions. Based on the comprehensive World Health Organization (WHO) patient safety curriculum, this program emphasizes the utilization of innovative technological tools to monitor, record, and understand patient safety practices, ultimately leading to improved healthcare quality.

COURSE OVERVIEW

The course comprises of 11 segments based on these themes:

A. Principles of International Patient Safety Goals (IPSG):

Participants will gain an in-depth understanding of the internationally recognized IPSG, integrating WHO guidelines into their patient safety practices.

B. Implementing the Infection Prevention and Control Program:

Participants will learn strategies, protocols, and technologies to effectively prevent and control infections, reducing risks to both patients and healthcare providers.

C. Patient Safety in ICU (Adult ICU):

The course focuses on the unique challenges and risks associated with ICU care and provides methods and approaches to ensure patient safety in this critical setting.

The course offers over 20 mobile app enabled tools that should be used seamlessly in an ICU setting to monitor and keep patients safe.

COURSE OUTCOME

By completing this course, you will acquire the following essential skills:

- Sufficient knowledge of patient safety in ICU settings (Adult ICU)
- Proficiency in using tools to monitor, record, and gauge patient safety practices
- Ability to quantify and qualify patient safety practices in the ICU setting
- Expertise in implementing methods and approaches to improve patient safety practices

COURSE DELIVERY

The course is offered through a blended learning approach, combining online learning and teaching programs with case studies and project work that engage participants in using realtime tools and resources. This format provides flexibility and convenience, allowing you to access course materials and engage in interactive discussions at your own pace. The use of technology-based solutions enhances your learning experience and enables the application of modern practices in patient safety.

COURSE DURATION

16 Weeks

Start Date: 1st DEC 23

MEDIUM OF INSTRUCTION

English shall be the medium of instruction for all subjects of study and examinations will be conducted only in English.

COURSE DIRECTOR

DR. USHA VISHWANATH

MBBS, MD (Ob & G) Dip. in Hospital Administration
Professor of Obstetrics & Gynaecology

COURSE CO-ORDINATOR

DR. RENUKA M.K

M.B.B.S, D.A. D.N.B (Anaesthesiology)
Professor & HOD,
Department of Critical Care Medicine

ELIGIBILITY

A candidate who seeks admission to the Certificate Course in Patient Safety must possess a

- Degree in Medicine/Nursing
- Masters in Business Administration with specialization in healthcare equivalent, awarded by any recognized University

CREDIT HOURS

The Course offers 12 Credit Hours from completion of the following elements.

Interactive Sessions (Blended Learning)

55 Hours

Discussion Forum/ asynchronous Mentoring

7 Hours

Training on Tools

12 Hours

Self-Study hours including Assessment

50 Hours

Practical Sessions

240 Hours

Join the Certificate Course in Patient Safety and become a catalyst for positive change in patient care. Enroll today to gain the knowledge, skills, and technological expertise required to improve patient safety practices in ICU settings.

Course fees

Rs. 35,000 inclusive of GST

CERTIFICATE OF COMPLETION

Upon successful completion of the course, you will receive a certificate issued jointly by HQAD – SRH, SRIHER (DU), AHPI, and IBHAR, validating your proficiency in patient safety practices and your commitment to enhancing healthcare quality.
