The Sri Ramachandra Perinatal Centre of Excellence (SRPCE) was initiated in the year April 2012. SRPCE aims to provide comprehensive care for mother and new born babies before, during and after delivery.

### **Objectives:**

- To provide the best care possible for all newborn babies and their families.
- We plan to specialize in providing care to newborn babies with health problems, whether they are detected pregnancy, or are found at the time of delivery. By providing excellent clinical care to all newborns, performing research to continuously improve the care we offer, and training the future leaders in neonatology & perinatology, the Perinatal Centre strives to improve the lives of all babies.
